NSW Point Bulk Address Validation
Request

Organisation details

Date	
Primary contact person	
Organisation name	
Cluster	
Email	
Phone	

Project details

Project name or application	
Project delivery timeframe	

Is this a one-off or ongoing job? If ongoing, expected frequency:

Do you intend to implement NSW Point address validation into an online form? If yes, please provide your timeframe. If not, is there a constraint preventing you from using NSW Point?

Data details

Number of datasets	
Number of records in each dataset	
Supply format/file type	

Please list each field name that will be supplied in your address data

Please identify the address types that will be included in your address data (please check all that apply):

- NSW state level addresses

- Australia wide addresses

- International addresses (will not be validated through NSW Point Bulk Address Services)

- Physical addresses

- Postal addresses (PO Box, GPO Box etc)

- Do you require validation of postal addresses?
(Please note postal addresses may be validated by our services but cannot be geocoded)

Validation request details

Q1. How is address data important to your project?

Q2. Please outline your project's requirements from our bulk addressing services

Q3. How do you intend to use the output of our bulk addressing services?

Q4. Please rank the following in terms of your priority (1-5)

Address matching and validation against a recognised national address dataset.

Address geocoding (Address, Road and Suburb level matching).

Address match quality and accuracy information that assists in defining the reliability of the automated matching process.

Address parsing – Provision of matched addresses in a "parsed" address format that conforms to AS/NZ 4590 Standards.

Other – Please specify:

Q5. Please identify which of the following need to be included in the output data (check all that apply)

ABS Australian Statistical Geography Standard (ASGS)

2016 ASGS	2021 ASGS
Mesh block	
Statistical Areas SA1	
Statistical Areas SA2	
Statistical Areas SA3	
Statistical Areas SA4
